

AGRISORB

KILN DRIED SAWDUST

The Most Cost Effective Cubicle Bedding

Agrisorb kiln dried sawdust is supplied in convenient waterproof packs of 60 bales on large 'pallets' for stability of handling and suitability for outside storage.

- **Super Absorbent**
Keeps animals clean and dry
- **No Dust Clouds**
Graded for consistent particle size and minimal fine dust
- **Quality Assured**
Graded sawdust with no contamination
- **Waterproof Packaging**
Makes outside storage easier

'The Agrisorb sila wrapped pallets were stored outside without any water penetrating the bales and I found the sawdust much less dusty than other products. We were 100% satisfied and will use it again.'

*Alan Warrington, Aspley House Farm.
(milking 250 cows)*

Because Agrisorb is so effective it is used by more dairy farmers than any other sawdust brand in the UK. What's more, Agrisorb is the chosen cubicle bedding of leading agricultural colleges, dairy research centres and the Genus herd.

- **More Economical**
Agrisorb kiln dried sawdust is super absorbent, so relatively little is needed. For any given weight Agrisorb will go up to twice as far as heavier inferior products
- **Safe to Store Outside**
Both bales and pallet bundles are waterproof
- **Ideal for Cow Mats**
Doesn't 'float away'. So gives maximum absorbency where it's needed
- **Ideal for Slurry Systems**
Consistent particle size – no system blockages. No risk of abrasive contamination. Kind to pumps
